FinaleMusicBot

This is a basic conceptual Music bot on Discord App.
It works using different youtube based node modules and does basic things like:

!join - invites bot to join the voice channel
!play - playing the music
!add - adding to queue
!stop - stopping the play
!skip - skipping

Link - https://discord.gg/HhxByBf4

If you want to open and run it from this pack, then you'll need to install Node.js and FFMPG separately.

Download and Install Node.js

Node.js is what will be used to run the bot.
Download [Node.js 14.X from the website](https://nodejs.org/en/).

Download FFMPEG

Download FFMPEG from [this website](https://ffmpeg.zeranoe.com/builds/).
